Outer Space

A VISUAL ARTIST'S
ART & SPACE TOUR OF THE UNIVERSE

THE ASTRONOMER

*"We are all part of this universe:
we are in this universe, but perhaps more
important that both of those facts, is that the universe is in us."*
Astrophysicist, Neil deGrasse Tyson

INTRODUCTION Artist Statement

As R. Buckminster Fuller put it, "We are all astronauts on a little spaceship called earth!" Our knowledge of the universe depends largely on the achievements of science, technology, engineering, and mathematics.

The arts- fine arts, theater, literature, music, poetry, etc.- can offer alternative ways of comprehending our universe.

I believe that society is best served culturally and intellectually when these disciplines collaborate toward our understanding of the cosmos. I believe that art can be instructive in observing and expressing the human experience of outer space.

A quote by Albert Einstein, "imagination is more important than knowledge" best describes my methodology as a visual artist. My assemblage artworks are developed and constructed based on credible informed sources (knowledge) and on the theoretical (imagination).

The artist as tour guide can provide another way of observing and interpreting the universe we inhabit.
